Product Highlights

The promotion features our top-selling strain Blueberry Muffin, along with additions like Papaya Runtz, Candy Fumez, and Garlic Cookies just to name a few.

Solventless & Strain-Specific

Our Live Rosin Badder is crafted without the use of any chemical solvents—just pure ice, water, heat, and pressure. This solventless process preserves the full-spectrum cannabinoids and terpenes of each strain, delivering a clean, true-to-plant experience.

Live-Pressed, Cold-Cured

We press fresh-frozen cannabis to extract live rosin, preserving the delicate terpenes and natural essence of the plant at its peak. This method results in a rich, flavorful badder that's easy to handle and delivers a potent, well-rounded high.

Small-Batch, Ultra-Pure

We produce our Live Rosin Badder in small batches to maintain quality and consistency. This hands-on approach ensures that every jar meets the highest standards, with no fillers, additives, or unwanted plant material—just pure, high-quality cannabis extract.
